Go Beyond the Kitchen Countertop with Caesarstone*

Caesarstone quartz surfaces are the ideal solution for kitchen countertops and kitchen islands. But what about other areas in the home or other applications inside the home?

Caesarstone surfaces are also popular for use around the fireplace, on featured walls, laundry room countertops and in the dining room to add a touch of style and sophistication.

The surfaces are ideal for furniture pieces like coffee tables and entertainment units, and they are perfect for wet areas, like bathrooms and wet bars, due to the nonporous nature of the material.

Fireplace surrounds

Caesarstone is heat resistant, which makes it a great choice for a fireplace surround. Combining both modern and traditional aesthetics, this fireplace is transformed into an eye-catching design element within the home.

Cabinet cladding

If you're looking to make a bold statement, have your cabinets built out of quartz. This look allows you to create a seamless design between countertop and cabinetry.

Shower and bath surfaces

With Caesarstone quartz slabs, there is no need for grout, there are few to no seams, and cleaning is a breeze. Since Caesarstone quartz is nonporous, it's the ideal material for moist and warm areas like the shower and surrounding bathroom walls.

Furniture

Make your rooms stand out by adding quartz surfacing to dining room tables, coffee tables, entertainment units and more to transition the flow of materials from room to room. All Caesarstone products can be used for custom-made furniture for use in home interiors.

*Although beautiful, not all applications and installations are covered under our Caesarstone warranty. Be sure to follow installation guidelines and review the Caesarstone warranty on our website before finalizing any design or application.
