Same maintenance
as indoor Caesarstone

Durable

For the first time, Caesarstone is taking its loved, premium surface to the outdoors. Designed, innovated and tested to withstand the sun's rays and the most extreme environmental conditions over the long term, the new Outdoor Collection provides an answer for consumers' desire to cook, dine and entertain comfortably in an outdoor kitchen.

The Industry-first Outdoor Collection is designed with an innovative technology that combines the convenience of stain resistant, easy to clean, highly durable surface with properties that withstand all the elements-come rain, snow or shine.

515 Palm Shade

Taking the classic look of white marble outside, Palm Shade has the ability to define the kitchen garden: as an elegant counter next to stainless steel barbecues, a contemporary contrast to wooden butcher-block, or as a spectacular island by the pool. Its white base and discrete veining are anything but plain; its translucency giving the surface authentic depth. Versatile by design, this beautified stone complements neutral facades and multiple landscaping materials, decking and pavers. Palm Shade is a fresh accent that brings lightness to an outdoor setting, where preparing food has never been so refined.

406 Clearskies

Contemporary backyards embrace organic materials such as concrete, slate, clay pavers and wooden decks, finished by black garden lighting and metal furniture. These are each complementary to Clearskies, which brings the earthen look of a pebble's surface to outdoor countertops, backsplashes and tables. Stovetops in either stainless or black, with steel and brass accents bring a stylish accent to other items such as handles and cookware. Healthy meals are prepared outdoors by grilling, steaming and smoking, served on plates of any material including ceramics, wooden planks or slate boards.

405 Midday

Sitting quietly alongside stainless steel cooktops, Midday works equally well next to neutral façades, tiling and stone or light wooden decking. The organic look correlates to the beauty of nature, conjuring up relaxing gardens with metal furniture in white or glass - or more classic seating in wicker. Plant pots in warm grey, beige or terracotta complete the outside setting; the surrounding green foliage creating a play of light and shadows on this stylish countertop.

Performance

Caesarstone Outdoor was designed to have excellent performance. After thorough testing both in the lab and in the field, we have proven that Caesarstone’s Outdoor surfaces are highly resistant to all seasonal weather and environmental conditions; every day wear and tear; and have exceptional functional and physical properties. Caesarstone Outdoor surfaces remain consistent after long term exposure to the sun and seasonal changes.

Caesarstone Outdoor vs. Alternate Outdoor Materials

		Caesarstone Outdoor	Ceramic	Granite	Concrete	Stainless steel
Mechanical and physical properties	Flexural Strength Shows the mechanical strength of the product (e.g how much weight it can endure).	+++	++ ¹	++ ¹	+	N.A
	Impact Resistance Shows how tough the slab is and reflects its durability against impact from falling objects.	+++	+ ¹	++ ¹	++	N.A
Aspects of use	Scratch Resistance	+++	+++	++	+	+
	Staining Resistance	+++	+++	+++ ²	+	+
Weathering resistance	Water Absorbance Simulates constant exposure to water which is similar to a situation of continuous rain.	+++	+++ ³	++	+	N.A
	Environmental Heat Resistance Simulates a continuous exposure to high environmental temperatures	+++	+++	+++	+++	+++
	Outdoor UV Resistance	+++	+++	++	+++	+++
	Freeze Resistance	+++	+++	++	++	+++

¹ The samples were strengthened with a supportive net on the opposite side. We assume that the results would be inferior, had the net not been used.

² Granite is covered with a protective sealer that requires resealing every few months. The sealer improves stain resistance.

³ Granite is covered with a protective sealer that requires resealing every few months. The sealer improves stain resistance.

Care & Maintenance Instructions

Care & maintenance, and stain removal for Caesarstone Outdoor are the same as for indoor Caesarstone surfaces. In addition, we recommend the following to keep your Caesarstone Outdoor looking its best:

- Cover the countertop when not in use.
- Do not leave metal objects on the countertop as they may cause rust stains.
- Do not use deep fat fryers on the surface.
- Clean any stains or residue as soon as possible to prevent them from drying on the surface.

Fabrication and Installation Instructions

Caesarstone Outdoor performs the same as Caesarstone's indoor products in most aspects relating to fabrication, installation, repairs, and care & maintenance. In most cases, the same procedures, tools and equipment can be used for both products.

*Please note that Caesarstone Outdoor is not suitable for flooring and wall cladding.
